Preface	xvii
Units and symbols	xviii
Glossary	xix
1 Arithmetic	1
1.1 Terminology of number systems	1
1.2 The decimal system	1
Addition and subtraction of decimals	2
Multiplication and division – decimals	2
1.3 Degrees of accuracy	4
Rounding numbers	4
1.4 Accuracy in calculation	4
1.5 Powers and roots and standard form	4
General rules for indices	5
1.6 Standard form	5
Multiplying and dividing numbers in standard form	5
1.7 Factors	6
1.8 Fractions	6
Addition and subtraction	6
Fractions and whole numbers	6
Combined addition and subtraction	7
Multiplication and division of fractions	7
Order of performing operations in problems involving fractions	7
1.9 Ratio and proportion. Percentages	8
Examples of ratios in vehicle technology	8
1.10 The binary system	10
Most significant bit (MSB)	10
Hexadecimal	10
Converting base 10 numbers to binary	10
Uses of binary numbers in vehicle systems	10
1.11 Directed numbers	11
Rules for dealing with directed numbers	11
1.12 Summary of main points	12
1.13 Exercises	12

2	Statistics – An introduction	16
2.1	Definition	16
2.2	Collecting and sorting raw data	17
2.3	Making sense of data	17
	Discrete variables	17
	Continuous variables	17
2.4	Descriptive statistics – pictographs	18
	Pie charts	18
2.5	Interpreting data. Statistical inference	19
	Frequency and tally charts	19
	The tally chart and frequency distribution	19
2.6	Importance of the shape of a frequency distribution	20
	The histogram	20
	The frequency polygon	20
	Cumulative frequency	21
2.7	Interpreting statistics	22
	Sampling	22
2.8	Features of the population that are looked for in a sample	22
	Average	22
2.9	The normal distribution	23
	Importance of the normal distribution	24
	Other ways of viewing frequency distributions – quartiles, deciles, percentiles	25
2.10	Summary of main points	26
2.11	Exercises	26
3	Algebra and graphs	29
3.1	Introduction	29
3.2	Formulae	29
3.3	Evaluating formulae	29
3.4	Processes in algebra	30
	Brackets	30
3.5	Algebraic expressions and simplification	30
	Expression	30
3.6	Factorising	31
3.7	Equations	31
	Solving equations	31
3.8	Transposition of formulae	33
3.9	Graphs	34
	Variables	34
	Scales	34
	Coordinates	35
3.10	Graphs and equations	36
	The straight-line graph	36
3.11	Summary of main points	37

3.12	Exercises	38
	Exercises – Section 3.3	38
	Exercises – Section 3.4	38
	Exercises – Section 3.5	38
	Exercises – Section 3.6	38
	Exercises – Section 3.7	38
	Exercises – Section 3.8	38
	Exercises – Section 3.10	38
4	Geometry and trigonometry	41
4.1	Angles	41
	Angular measurement	41
	Angles and rotation	41
4.2	Examples of angles in automotive work	42
	Angles and lines	43
	Adding and subtracting angles	43
4.3	Types of angle	44
	Adjacent angles	44
	Opposite angles	44
	Corresponding angles	44
	Alternate angles	44
	Supplementary angles	44
	Complementary angles	44
4.4	Types of triangle	45
	Acute angled triangle	45
	Obtuse angled triangle	45
	Equilateral triangle	45
	Isosceles triangle	45
	Scalene triangle	45
	Right angled triangle	46
	Labelling sides and angles of a triangle	46
	Sum of the three angles of a triangle	46
4.5	Pythagoras' theorem	46
4.6	Circles	46
	Ratio of diameter and circumference π	47
	Length of arc	47
4.7	Timing marks	47
4.8	Wheel revolutions and distance travelled	48
4.9	Valve opening area	48
4.10	Trigonometry	48
4.11	Using sines, cosines and tangents	49
	Sines	49
	Cosines	50
	Tangents	51
4.12	Summary of formulae	52

4.13	Exercises	52
	Exercises – Section 4.2	53
	Exercises – Section 4.3	53
	Exercises – Section 4.4	54
	Exercises – Section 4.5	55
	Exercises – Section 4.6	55
5	Forces	58
5.1	Force	58
5.2	Types of force – examples	58
5.3	Describing forces	58
5.4	Graphical representation of a force	58
5.5	Addition of forces	59
5.6	Parallelogram of forces	60
5.7	Triangle of forces	60
5.8	Resolution of forces	61
5.9	Mass	62
5.10	Equilibrium	62
5.11	Pressure	62
5.12	Pressure in hydraulic systems	63
5.13	Hooke’s law	64
5.14	Practical applications	65
5.15	Summary	65
5.16	Exercises	65
6	Materials – Stress, strain, elasticity	68
6.1	Introduction	68
6.2	Stress	68
	Types of stress	68
6.3	Tensile test	69
6.4	Examples of stress and strain	70
6.5	Stress raisers	71
6.6	Strain	72
	Shear strain	72
6.7	Elasticity	73
	Stress, strain, elasticity	73
6.8	Tensile strength	73
6.9	Factor of safety	74
6.10	Torsional stress	74
6.11	Strain energy	75
6.12	Strength of materials	75
6.13	Other terms used in describing materials	75
6.14	Non-ferrous metals	76
6.15	Non-metallic materials	76
	Kevlar	76
6.16	Recycling of materials	77

6.17	Summary of main formulae	77
6.18	Exercises	77
7	Levers and moments, torque and gears	79
7.1	Levers	79
7.2	Principles of leverage	79
7.3	The principle of moments	79
7.4	The bell crank lever	81
	A practical application of the bell crank lever	81
7.5	Axle loadings	82
7.6	Torque	83
7.7	Engine torque	83
7.8	Leverage and gears	84
	Torque multiplication	84
	Drivers and driven	85
7.9	Gear trains: calculating gear ratios	85
	Spur gear ratios	85
7.10	Couples	85
7.11	Summary of main points	85
7.12	Exercises	86
8	Work energy, power and machines	89
8.1	Work	89
8.2	Power	89
8.3	Work done by a torque	90
8.4	Work done by a constantly varying force	90
	Mid-ordinate method for calculating work done	91
8.5	Energy	92
	Potential energy	92
	Chemical energy	92
	Conservation of energy	92
	Energy equation	92
	Kinetic energy	92
	Energy of a falling body	93
	Kinetic energy of rotation	93
8.6	Machines	94
	Mechanical advantage	94
	Velocity ratio (movement ratio)	95
	Efficiency of a machine	95
	Work done against friction	95
	A steering mechanism as a machine	95
8.7	Summary of formulae	97
8.8	Exercises	98

9	Friction	99
9.1	Introduction	99
	Coefficient of friction	99
	Static friction	100
	Sliding friction	100
9.2	Making use of friction	100
	Clutch	100
	Belt drive	101
9.3	Brakes	103
	Drum brake – basic principle	103
	Disc brake	103
	Tyres	105
	Braking efficiency	106
9.4	Angle of friction	107
9.5	Inclined plane	108
	Inclined plane without friction	108
	Inclined plane with friction	108
9.6	Screw thread	108
	V-thread	109
9.7	Friction in a journal bearing	110
9.8	Summary of formulae	111
9.9	Exercises	111
10	Velocity and acceleration, speed	113
10.1	Speed and velocity	113
10.2	Acceleration	113
10.3	Velocity–time graph	113
	Uniform velocity	113
	Uniform acceleration	113
10.4	Equations of motion and their application to vehicle technology	114
10.5	Force, mass and acceleration	115
	Newton’s laws of motion	115
10.6	Relation between mass and weight	115
10.7	Inertia	115
10.8	Motion under gravity	116
10.9	Angular (circular) motion	116
10.10	Equations of angular motion	116
10.11	Relation between angular and linear velocity	117
10.12	Centripetal acceleration	117
	Accelerating torque	118
10.13	Exercises	119
11	Vehicle dynamics	120
11.1	Load transfer under acceleration	120
11.2	Static reactions	120
11.3	Vehicle under acceleration	121

11.4	Vehicle acceleration – effect of load transfer	122
	Front wheel drive	122
	Maximum acceleration – rear wheel drive	123
	Four wheel drive – fixed	123
	Four wheel drive – with third differential	123
11.5	Accelerating force – tractive effort	123
11.6	Tractive resistance	123
11.7	Power required to propel vehicle	124
	Power available	124
11.8	Forces on a vehicle on a gradient – gradient resistance	126
11.9	Gradeability	126
11.10	Vehicle power on a gradient	128
11.11	Vehicle on a curved track	128
	Overturning speed	128
	Skidding speed	130
11.12	Summary of formulae	130
11.13	Exercises	130
12	Balancing and vibrations	132
12.1	Introduction	132
12.2	Balance of rotating masses acting in the same plane (coplanar)	132
12.3	Balancing of a number of forces acting in the same plane of revolution (coplanar forces)	133
12.4	Wheel and tyre balance	134
12.5	Engine balance	135
12.6	Balance in a single-cylinder engine	135
12.7	Primary and secondary forces	136
	Graph of primary and secondary forces	136
12.8	Secondary force balancer	137
	Harmonics	137
12.9	Balance of rotating parts of the single cylinder engine	138
12.10	Four-cylinder in-line engine balance	139
12.11	Couples and distance between crank throws	139
12.12	Simple harmonic motion (SHM)	139
12.13	Applications of SHM	141
	Vibration of a helical coil spring	141
12.14	Torsional vibration	142
12.15	Free vibrations	142
	Example of free vibrations	142
12.16	Forced vibrations	143
	Resonance	143
	Driveline vibrations	143
	Damping	143
	Vibration dampers	143
	Dual mass flywheel	144
	Cams	144

12.17	Summary of formulae	146
12.18	Exercises	146
13	Heat and temperature	148
13.1	Temperature	148
	Thermodynamic temperature scale (Kelvin)	148
	Cooling system temperature	148
13.2	Standard temperature and pressure (STP)	148
13.3	Thermal expansion	148
13.4	Heat	149
	Sensible heat	149
	Latent heat	149
	Specific latent heat	149
	Specific heat capacity	150
	Quantity of heat	150
13.5	Heat transfer	150
	Conduction	150
	Convection	150
	Radiation	151
13.6	Heating, expansion and compression of gases	151
	Absolute pressure	151
	Absolute temperature	151
13.7	Laws relating to the compression and expansion of gases	151
	Heating a gas at constant volume	151
	Heating a gas at constant pressure	152
	Charles' law	152
	Expansion or compression at constant temperature – isothermal	152
	General law $pV^n = C$, expansion of gas	153
	Combined gas law	153
	Adiabatic expansion $pV^\gamma = C$, expansion of gas	153
	Throttling expansion	153
	Adiabatic index for air	153
	General equations relating to expansion of gases	154
13.8	Pressure–volume (pV) diagrams	154
	Work done during expansion or compression of a gas	154
	Work done during hyperbolic expansion	154
	Work done during expansion where $pV^n = C$	154
	Work done during adiabatic expansion where $pV^\gamma = C$	155
13.9	Summary of formulae	155
13.10	Exercises	155
14	Internal combustion engines	158
14.1	Engine power	158
	Brake power	158
14.2	Dynamometers for high-speed engines	159
14.3	Horsepower	160

14.4	PS – the DIN	160
14.5	Indicated power	160
14.6	Mean effective pressure	160
14.7	Calculation of indicated power	161
14.8	Cylinder pressure vs. crank angle	162
14.9	Mechanical efficiency of an engine	164
14.10	Morse test	164
14.11	Characteristic curves of engine performance	164
14.12	Volumetric efficiency	165
14.13	Torque vs. engine speed	165
14.14	Specific fuel consumption vs. engine speed	166
14.15	Brake power, torque and sfc compared	167
14.16	Brake mean effective pressure	167
14.17	Thermal efficiency	168
14.18	Indicated thermal efficiency	168
14.19	Brake thermal efficiency petrol vs. diesel	168
14.20	Heat energy balance	169
14.21	Effect of altitude on engine performance	170
14.22	Summary of main formulae	170
14.23	Exercises	170
15	Theoretical engine cycles	172
15.1	The constant volume cycle (Otto cycle)	172
	Thermal efficiency of the theoretical Otto cycle	173
	Thermal efficiency in terms of compression ratio r	173
	Effect of compression ratio on thermal efficiency	174
15.2	Relative efficiency	174
15.3	Diesel or constant pressure cycle	175
15.4	The dual combustion cycle	176
	Operation of dual combustion cycle	176
15.5	Comparison between theoretical and practical engine cycles	177
15.6	The Stirling engine	178
	The Stirling engine regenerator	178
	A double-acting Stirling engine	179
15.7	The gas turbine	180
15.8	Summary of formulae	182
15.9	Exercises	182
16	Fuels and combustion & emissions	184
16.1	Calorific value	184
16.2	Combustion	184
	Products of combustion	184
	Relevant combustion equations	185
16.3	Air–fuel ratio	185
	Petrol engine combustion	185

	Detonation	185
	Pre-ignition	185
16.4	Octane rating	186
16.5	Compression ignition	186
	Compression ignition engine combustion chambers	186
16.6	Diesel fuel	187
	Flash point	187
	Pour point	187
	Cloud point	187
16.7	Exhaust emissions	188
	Factors affecting exhaust emissions	188
16.8	European emissions standards	189
	Emissions and their causes	189
16.9	Methods of controlling exhaust emissions	190
	Exhaust gas recirculation	191
	Catalysts	191
	Diesel particulate filters	192
16.10	Biofuels	193
16.11	Liquefied petroleum gas (LPG)	193
16.12	Hydrogen	193
16.13	Zero emissions vehicles (ZEVs)	194
16.14	Exercises	194
17	Electrical principles	196
17.1	Electric current	196
17.2	Atoms and electrons	196
17.3	Conductors and insulators	196
	Conductors	196
	Semiconductors	197
	Insulators	197
17.4	Electromotive force	197
17.5	Electrical power sources – producing electricity	197
	Chemical power source	197
	Magnetic power source	197
	Thermal power source	197
17.6	Effects of electric current – using electricity	198
17.7	Electrical circuits	198
	Circuit principles	198
	A simple circuit	198
	Direction of current flow	198
17.8	Electrical units	200
	Volt	200
	Ampere	200
	Ohm	200
	Watt	200
17.9	Ohm’s law	200

17.10	Resistors in series	201
17.11	Resistors in parallel	201
17.12	Alternative method of finding total current in a circuit containing resistors in parallel	202
17.13	Measuring current and voltage	202
17.14	Ohmmeter	202
17.15	Open circuit	202
17.16	Short circuit	203
17.17	Temperature coefficient of resistance	203
	Negative temperature coefficient	203
17.18	Electricity and magnetism	203
	Permanent magnets	203
	The magnetic effect of an electric current	204
	Direction of the magnetic field due to an electric current in a straight conductor	204
	Magnetic field caused by a coil of wire	205
17.19	Solenoid and relay	205
17.20	Electromagnetic induction	205
17.21	The electric motor effect	206
17.22	Fleming's rule	207
17.23	Alternating current	207
	Cycle	207
	Period	207
	Frequency	208
17.24	Applications of alternating current	208
17.25	Transformer	208
17.26	Lenz's law	208
17.27	Inductance	209
17.28	Back emf	209
17.29	Inductive reactance	209
17.30	Time constant for an inductive circuit	209
17.31	Capacitors	210
	Capacitance	210
17.32	Capacitors in circuits	211
	Contact breaker ignition circuit	211
	Capacitive discharge ignition system	211
	Capacitors in parallel and series	212
	Impedance	212
17.33	Summary of formulae	212
17.34	Exercises	213
18	Electronic principles	216
18.1	Introduction	216
18.2	Semiconductors	216
	Effect of dopants	217
	Electrons and holes	217

18.3	The p–n junction	217
18.4	Bias	217
18.5	Behaviour of a p–n junction diode	217
18.6	Diode protection resistor	218
18.7	Negative temperature coefficient of resistance – semiconductor	218
18.8	The Zener diode	218
18.9	Light emitting diode (LED)	219
	Voltage and current in an LED	219
18.10	Photodiode	219
18.11	Bipolar transistors	219
	Basic operation of transistor	220
	Current gain in transistor	220
	Current flow in transistors	220
18.12	Transistor circuit used in automotive applications	221
	Voltage amplifier	221
	Darlington pair	221
	Heat sink	221
18.13	Filter circuits	222
	Voltage divider	222
18.14	Integrated circuits	223
18.15	Sensors and actuators	223
18.16	Control unit (computer) inputs and outputs	225
18.17	Logic gates	225
	The RTL NOR gate	225
	Truth tables	225
18.18	Bits, bytes and baud	227
18.19	Summary of formulae	227
18.20	Exercises	227
	Answers to self-assessment questions	229
	Index	235
