

# Table of Content

1	Introduction	1
2	Fundamentals of Statistics and Probability Theory	7
3	Reliability Analysis of a Transmission	84
4	FMEA – Failure Mode and Effects Analysis	98
5	Fault Tree Analysis, FTA	160
6	Assessment of Lifetime Tests and Failure Statistics	191
7	Weibull Parameters for Specifically Selected Machine Components	255
8	Methods for Reliability Test Planning	264
9	Lifetime Calculations for Machine Components	291
10	Maintenance and Reliability	338
11	Reliability Assurance Program	403
	Solutions	414
	Appendix	473
