

## Table of Contents

Foreword .....	v
Preface .....	vii
Abstract .....	ix
List of Figures .....	xvii
List of Tables .....	xxi
Glossary of Commonly Used Abbreviations .....	xxiii
Glossary of Commonly Used Symbols.....	xxv
Chapter 1: Introduction .....	1
1.1 Problem Statement .....	4
1.2 Delimitation .....	7
1.3 Methodology.....	8
1.3.1 Theoretical Basis.....	8
1.3.2 Data Basis.....	8
1.3.3 Reliability and Validity .....	9
Chapter 2: The Automotive Development Process .....	13
2.1 The Setting of the Automobile Development Process .....	13
2.2 The Automotive Development Process.....	16
2.3 Present Value Method for the Automotive Development Process .....	27
2.4 Models of Automotive Development .....	29
2.4.1 Point-Based Serial Engineering .....	31
2.4.2 Point-Based Concurrent Engineering .....	33
2.4.3 Set-Based Concurrent Engineering.....	35
2.5 Comparative Analysis of the Point- and Set-Based Models of Development ...	46
2.5.1 Level of Integration .....	47
2.5.2 Cost of Strategy.....	48
2.5.3 Uncertainty and Flexibility .....	48
2.5.4 Trade-off between Investment Costs and Flexibility to Switch.....	49

---

2.6	Chapter Summary .....	52
Chapter 3: Competitive Advantage and the Automotive Development Process.....		54
3.1	Achieving a Competitive Advantage Utilizing the Development Process .....	55
3.1.1	The Organizational Process of Sequential Choice .....	56
3.1.2	Industry Structural Analysis.....	57
3.1.3	Resources and Capabilities .....	57
3.1.4	Meta-Learning and Absorptive Capacity.....	61
3.1.5	Ranking Capabilities: Architectural and Component Capabilities .....	63
3.1.6	Modularity and Capabilities.....	65
3.2	Empirical Research of Automotive Development Processes .....	68
3.2.1	Using Prototypes to Achieve Internal and External Integration.....	68
3.2.2	Observed Point- and Set-Based Development Processes.....	74
3.2.3	Toyota’s Three Principles for Set-Based Development .....	78
3.2.4	Involving Suppliers in the Automotive Development Process.....	84
3.3	Toyota’s Development System – A Resource-Based Analysis .....	91
3.3.1	Toyota’s Supplier Relationships.....	92
3.3.2	Unique Assets and Capabilities in Toyota’s Development Process .....	95
3.4	Chapter Summary .....	103
Chapter 4: Real Option Model of the Automotive Development Process .....		106
4.1	The Role and Structure of Financial Markets .....	107
4.1.1	The Discipline of Financial Markets.....	107
4.1.2	Separating the Investment and Financing Decisions.....	108
4.1.3	Financial Economics, Free Cash Flows, and Strategic Management .....	108
4.1.4	Capabilities and Real Options.....	109
4.2	General Asset Valuation.....	113
4.2.1	A Multiperiod Securities Market Model.....	113
4.2.2	No Arbitrage Condition .....	115
4.2.3	Equivalent Martingale Measure .....	115
4.2.4	Lattice of Asset Price Movements - The Binomial Tree.....	117
4.2.5	Complete Markets – Spanning and Equilibrium Pricing Models .....	119

4.2.6	Incomplete Markets – Partial Spanning Models .....	123
4.3	Option Valuation .....	127
4.3.1	Valuing Financial and Real Options.....	128
4.3.2	Real Options in the Automobile Development Process .....	130
4.3.3	The Real Option to Switch in the Automobile Development Process .....	133
4.4	The Option to Switch as a Multivariate Contingent Claim .....	135
4.4.1	Model Assumptions.....	136
4.4.2	Boyle, Evnine, and Gibbs (1989) – An $n$ -Dimensional Lattice .....	137
4.5	Chapter Summary .....	152
Chapter 5: Optimizing the Automotive Development Process.....		155
5.1	Value Drivers in the Automobile Development Process.....	155
5.1.1	The Option Value in the Point-Based Development Process .....	156
5.1.2	The Option Value in the Set-Based Development Process .....	158
5.2	Deriving an Optimal Development Process Setup .....	166
5.2.1	The Option Value of the Number of Design Alternatives .....	166
5.2.2	The Optimal Development Process Setup: Linear Cost Structure .....	168
5.2.3	The Optimal Development Process Setup: Non-Linear Cost Structure .....	172
5.3	Five Principles of Automotive Development.....	173
5.3.1	Capabilities in Platform Design and Developing Sets Concurrently.....	174
5.3.2	Volatility.....	174
5.3.3	Correlation .....	175
5.3.4	Dominant Design Alternatives.....	175
5.3.5	Capabilities to Manage Competent Suppliers.....	176
5.4	Model Criticism and Future Research.....	176
5.4.1	Model Criticism .....	177
5.4.2	Future Research .....	179
5.5	Chapter Summary .....	180
Chapter 6: Conclusion.....		183
6.1	Subproblem 1 .....	183
6.2	Subproblem 2 .....	184

6.3	Subproblem 3 .....	186
6.4	Subproblem 4 .....	187
6.5	Chapter Summary .....	189
	Appendix .....	193
	Bibliography .....	205
