Preface	ix
Acknowledgments	xii
SECTION 1: INDUSTRIAL PERSPECTIVE	1
Introduction	
Chapter 1	3
Direct chill casting of aluminium alloys Martin Jarrett, Bill Neilson and Estelle Manson-Whitton <i>Alcoa</i>	
Chapter 2	26
Continuous casting of aluminium alloys Philip Thomas <i>Holton Machinery</i>	
Chapter 3	48
Continuous casting of steels Hisao Esaka <i>National Defense Academy</i>	
Chapter 4	59
Castings in the automotive industry Kuniaki Mizuno <i>Aisin Takaoka</i>	
Chapter 5	69
Cast aluminium–silicon piston alloys John Woodthorpe, R Thomson, C Daykin and P Reed <i>Federal-Mogul</i>	

SECTION 2: MODELLING AND SIMULATION	77
Introduction	
Chapter 6	79
Mold filling simulation of die casting Koichi Anzai, Eisuke Niyama, Shinji Sannakanishi and Isamu Takahashi <i>Tohoku University</i>	
Chapter 7	87
The ten casting rules John Campbell <i>Birmingham University</i>	
Chapter 8	106
Grain selection in single crystal superalloy castings Philip Carter, David Cox, Charles-Andre Gandin and Roger Reed <i>Cambridge University</i>	
Chapter 9	121
Defects in aluminium shape casting Peter Lee <i>Imperial College</i>	
Chapter 10	142
Pattern formation during solidification John Hunt <i>Oxford University</i>	
Chapter 11	160
Peritectic solidification Hideyuki Yasuda, Itsuo Ohnaka, Kentaro Tokieda and Naohiro Notake <i>Osaka University</i>	
SECTION 3: STRUCTURE AND DEFECTS	175
Introduction	
Chapter 12	177
Heterogeneous nucleation in aluminium alloys Peter Schumacher <i>Oxford University</i>	

<p>Chapter 13 Control of grain size in solidification Lindsay Greer <i>Cambridge University</i></p>	199
<p>Chapter 14 Step casting Masayuki Kudoh, Tatsuya Ohmi and Kiyotaka Matsuura <i>Hokkaido University</i></p>	248
<p>Chapter 15 Intermetallic selection during solidification of aluminium alloys Keyna O'Reilly <i>Oxford University</i></p>	257
<p>Chapter 16 Cooling rate and the structure of commercial aluminium alloys Jim Kellie <i>London & Scandinavian Metallurgical</i></p>	271
<p>Chapter 17 Solidification structure control by magnetic fields Itsuo Ohnaka and Hideyuki Yasuda <i>Osaka University</i></p>	286
<p>Chapter 18 Direct observation of solidification and solid phase transformations Toshihiki Emi and Hiroyuki Shibata <i>Formerly CISR (TE) and Institute of Multidisciplinary Research for Advanced Materials (HS)</i></p>	298
<p>Chapter 19 Interfacial energy and solidification structures in aluminium–silicon alloys Hideo Nakae and Hiroaki Kanamori <i>Waseda University</i></p>	326
<p>SECTION 4: NEW MATERIALS AND PROCESSES Introduction</p>	339
<p>Chapter 20 Rheocasting of TiAl alloys and composites Kiyoschi Ichikawa and Yoshiji Kinoshita <i>MITI</i></p>	341

Chapter 21	359
Solidification of metallic glasses Nobuyuki Nishiyama and Akihisa Inoue <i>Tohoku University</i>	
Chapter 22	373
New eutectic ceramics Itsuo Ohnaka, Yoshiharu Waku, Hideyuki Yasuda and Yoshiki Mizutani <i>Osaka University</i>	
Chapter 23	390
Rapid solidification of peritectics Kuzuhiko Kuribayashi, Yuzuru Takamura and Kosuke Nagashio <i>Institute of Space and Aeronautical Science</i>	
Chapter 24	402
Peritectic solidification of superconducting oxides Yuh Shiohara, Makato Kambara, Teruo Izumi and Yuichi Nakamura <i>International Superconductivity Technology Center</i>	
Index	415
