<b>PART 1 INTRODUCTION TO FOOD ENGINEERING .....</b>	<b>1</b>
<b>1 The Food Engineer .....</b>	<b>3</b>
<i>Felix H. Barron</i>	
1.1 Nature of Work and Necessary Skills .....	3
1.2 Academic and Industry Preparation .....	4
1.3 Work Opportunities for a Food Engineer .....	7
1.3.1 Job description sample 1 .....	7
1.3.2 Job description sample 2 .....	8
1.3.3 Job description sample 3 .....	9
1.3.4 Job description sample 4 .....	9
1.3.5 Job description sample 5 .....	10
1.4 Engineering Jobs .....	12
1.5 Future Opportunities.....	14
1.6 Conclusions.....	14
References.....	14
<b>2 Food Regulations .....</b>	<b>15</b>
<i>Kevin M. Keener</i>	
2.1 Background.....	15
2.1.1 Federal Register.....	16
2.1.2 United States Code .....	17
2.2 Sanitation Programs.....	18
2.2.1 Sanitation .....	18
2.3 Hazard Analyses and Critical Control Point Program (HACCP).....	20
2.3.1 Prerequisite programs .....	21
2.4 Current Good Manufacturing Processes (cGMP).....	22
2.5 Meat Processing.....	24
2.6 Shell Eggs.....	26
2.6.1 Egg products .....	27
2.7 Seafood Processing.....	27
2.8 Fruits, Vegetables, and Nuts.....	29

2.9	Beverages.....	29
2.9.1	Alcoholic beverages .....	29
2.9.2	Carbonated beverages.....	30
2.9.3	Bottled water .....	30
2.9.4	Fruit and vegetable juices.....	31
2.9.5	Pasteurization.....	32
2.9.6	Milk and milk products .....	33
2.10	Canned Foods .....	34
2.11	Foodservice/Restaurants .....	35
2.12	Export Foods .....	35
2.13	Imported Foods.....	36
2.14	Organic Food Processing.....	38
2.15	Conclusions.....	39
	References.....	39
	Acronyms.....	42
<b>3</b>	<b>Food Safety Engineering.....</b>	<b>45</b>
	<i>Raghupathy Ramaswamy, Juhee Ahn, V. M. Balasubramaniam,</i>	
	<i>Luis Rodriguez Saona, and Ahmed E. Yousef</i>	
3.1	Introduction.....	45
3.2	Intervention Technologies .....	46
3.2.1	Novel non-thermal intervention technologies.....	46
3.2.2	Chemical interventions .....	50
3.2.3	Hurdle approach .....	53
3.3	Control/Monitoring/Identification Techniques .....	54
3.3.1	Chromogenic microbiological media.....	54
3.3.2	Molecular and immunological assays methods .....	55
3.3.3	Biosensors.....	56
3.3.4	Fourier Transform Infrared spectrometry.....	58
3.4	Packaging Applications in Food Safety .....	59
3.4.1	Active packaging .....	60
3.4.2	Intelligent or “Smart” packaging .....	60
3.4.3	Tamper evident packaging.....	60
3.5	Tracking and Traceability.....	61
3.6	Byproducts of Processing.....	62
3.6.1	Acrylamide .....	62
3.6.2	3-monochloropropanediol.....	63
3.7	Conclusions.....	63
3.8	Acknowledgment.....	64
	References.....	64

**PART 2 FARM MACHINERY DESIGN ..... 71**

**4 Farm Machinery Automation for Tillage Planting, Cultivation, and Harvesting ..... 73**  
*Brian T. Adams*

4.1 Introduction..... 73

4.2 Vehicle Guidance..... 74

    4.2.1 Guidance strategies..... 75

4.3 Implement Guidance Systems..... 80

4.4 Guidance Methods..... 80

    4.4.1 Global Positioning System (GPS)..... 82

    4.4.2 Machine vision ..... 84

    4.4.3 Dead reckoning..... 85

    4.4.4 Inertial..... 85

    4.4.5 Crop feelers ..... 85

    4.4.6 Furrow following..... 86

4.5 Challenges Facing Autonomous Vehicles ..... 86

    4.5.1 Safety ..... 87

    4.5.2 Liability..... 89

4.6 Conclusions..... 89

References..... 91

Other Contacts ..... 91

**5 Grain Harvesting Machinery Design ..... 93**  
*H. Mark Hanna and Graeme R. Quick*

5.1 Introduction..... 93

5.2 History ..... 93

5.3 Machine Design: Pre-harvest Issues ..... 94

5.4 Performance Factors ..... 95

5.5 Heads: Grain Platforms, Corn Heads, and Strippers ..... 95

5.6 Feederhouse ..... 99

5.7 Cylinder or Rotor and Concave ..... 99

5.8 Separation: Straw Walkers and Rotary Separation ..... 103

5.9 Cleaning Shoe..... 104

5.10 Elevators: Clean Grain and Tailings ..... 106

5.11 Grain Bin and Unloading Auger ..... 106

5.12 Other Attachments ..... 107

5.13 Operator’s Station, Adjustments, and Monitoring Systems..... 109

5.14 Field Performance ..... 110

5.15 Grain Damage..... 110

5.16	Combine Trends.....	111
	References.....	111
<b>6</b>	<b>Grain Storage Systems Design.....</b>	<b>113</b>
	<i>Ray Allen Bucklin, Sidney Thompson, Ali Abdel-Hadi, Michael Montross</i>	
6.1	Introduction.....	113
6.2	Materials.....	114
6.3	Physical Properties of Agricultural Grains.....	114
6.4	Management Factors.....	115
6.5	Codes.....	116
6.6	Drying.....	116
	6.6.1 Purpose of drying.....	116
	6.6.2 Classification of dryer types.....	117
	6.6.3 Theory and simulation of drying.....	119
6.7	Structural Loads.....	122
	6.7.1 Loads caused by the grain.....	124
	6.7.2 Eccentric discharging of grains from a bin.....	125
	6.7.3 Flumes.....	126
6.8	Stresses in Granular Materials.....	126
6.9	Temperature Cables.....	127
6.10	Thermal Loads and Moisture-induced Loads.....	128
6.11	Conical Grain Bins.....	129
	6.11.1 Flat storage.....	129
	6.11.2 Janssen's equation.....	132
	6.11.3 Flat storage, shallow, and deep bins.....	134
	6.11.4 Loads on hoppers.....	135
6.12	Snow and Wind Loads.....	137
6.13	Seismic Loads.....	141
6.14	Grain Handling.....	143
	6.14.1 Screw conveyors.....	144
	6.14.2 Belt conveyors.....	146
	6.14.3 Bucket elevators.....	148
	6.14.4 Pneumatic conveyors.....	151
6.15	Chutes.....	153
6.16	Grain Cleaning.....	153
6.17	Testers for Measuring Flow Properties.....	155
	6.17.1 Classification of flow testers.....	156
	6.17.2 Examples of flow testers.....	156
6.18	Modeling of Granular Materials.....	158
	References.....	162

<b>7 Milking Machines and Milking Parlors</b> .....	<b>167</b>
<i>Douglas J. Reinemann</i>	
7.1 Introduction.....	167
7.2 The Milking Routine .....	167
7.3 The Milking Machine.....	168
7.4 Milking Unit .....	169
7.5 Milking Systems.....	172
7.5.1 Pipeline systems .....	172
7.5.2 Weigh jar systems.....	172
7.6 Milking System Piping.....	173
7.7 Vacuum Production .....	174
7.8 Vacuum Regulation .....	176
7.9 Vacuum Gauge.....	177
7.10 Test Ports .....	178
7.11 Distribution Tank or Interceptor.....	178
7.12 Receiver Group.....	178
7.13 Pipe Sizing and Layout .....	179
7.14 Milkline Sizing—Pipeline Systems .....	179
7.15 Pulsator Airline Sizing .....	180
7.16 Main Airline.....	181
7.17 Vacuum Pump Sizing .....	181
7.18 Milking Parlors.....	182
7.19 Milking Parlor Construction Methods .....	183
7.20 Environmental Control .....	183
7.21 Milking Parlor Types.....	184
7.21.1 Herringbone .....	184
7.21.2 Parallel .....	185
7.21.3 Side open or tandem.....	185
7.21.4 Rotary or carousel .....	186
7.21.5 Flat .....	186
7.22 Other Milking Parlor Design Elements and Support Equipment.....	187
7.22.1 Entrance/exit gates.....	187
7.22.2 Automatic cluster removers .....	187
7.22.3 Crowd gates .....	188
7.22.4 Animal identification and data collection/records systems .....	188
7.23 Milking Parlor Hygiene.....	189
References.....	189

<b>PART 3 FOOD PROCESSING OPERATING SYSTEMS AND MACHINERY DESIGN.....</b>	<b>191</b>
<b>8 Dairy Product Processing Equipment.....</b>	<b>193</b>
<i>H. Doug Goff</i>	
8.1 Introduction.....	193
8.2 Clarification, Separation, and Standardization.....	194
8.3 Pasteurization.....	196
8.4 UHT Sterilization .....	202
8.5 Homogenization.....	202
8.6 Membrane Processing .....	205
8.7 Evaporation.....	205
8.8 Drying .....	208
8.9 Ice Cream Manufacturing Equipment.....	210
8.10 Butter Manufacturing Equipment.....	212
8.11 Cheese Manufacturing Equipment .....	213
References.....	214
<b>9 Grain Processing Engineering.....</b>	<b>215</b>
<i>Athapol Noomhorm, Imran Ahmad and Porntip Sirisoontaralak</i>	
9.1 Introduction.....	215
9.2 Drying .....	215
9.2.1 On-farm drying.....	216
9.3 Pre-storage Grain Treatments.....	219
9.3.1 Grain damage from insects.....	220
9.4 Post-harvest Value Additions.....	225
9.4.1 Artificial aging.....	225
9.4.2 Aroma enhancement of milled rice.....	229
9.5 Cooking and Processing .....	231
9.5.1 Retort packaging.....	231
9.5.2 Quick cooking brown rice.....	235
9.6 Quality Evaluation.....	238
9.6.1 Image analysis .....	238
9.6.2 Texture evaluation of cooked rice.....	239
9.7 Conclusions.....	242
References.....	242
<b>10 Technology of Processing of Horticultural Crops.....</b>	<b>251</b>
<i>Conrad O. Perera, Bronwen Smith</i>	
10.1 Introduction.....	251
10.1.1 General background.....	251

10.1.2	Importance of fruit and vegetables .....	251
10.1.3	Fruits and vegetables suitable for processing .....	252
10.1.4	Location of processing operation .....	252
10.1.5	Processing systems .....	252
10.2	Properties of Fruits and Vegetables.....	253
10.2.1	General background.....	253
10.2.2	Fruit development.....	254
10.2.3	Chemical composition .....	255
10.2.4	Structural features.....	261
10.3	Biological Deterioration and Control.....	262
10.4	Methods for Minimizing Deterioration.....	264
10.4.1	Physical methods of reducing deterioration.....	264
10.4.2	Methods for preserving fresh fruit and vegetables .....	266
10.5	General Methods of Fruit and Vegetable Preservation .....	267
10.5.1	Storage of fresh produce .....	267
10.5.2	Preservation by manipulation of water activity .....	267
10.5.3	Chemical preservation .....	268
10.5.4	Preservation by acidification .....	269
10.5.5	Preservation with sugar .....	272
10.5.6	Preservation by heat .....	272
10.5.7	Food irradiation .....	273
10.6	Some Important Methods of Processing of Fruits and Vegetables .....	274
10.6.1	Canning.....	274
10.6.2	Dehydration .....	276
10.6.3	Freezing .....	276
10.6.4	Semi-processing.....	277
10.6.5	Sugar preserved products .....	277
10.6.6	Juice processing.....	278
10.6.7	New trends—including minimal processing.....	284
10.7	Quality Control/Assurance .....	287
10.7.1	Traceability .....	289
10.7.2	HACCP .....	290
10.8	Fruit and Vegetable Processing Units .....	290
10.8.1	Preliminary studies .....	290
10.8.2	Production sites .....	291
10.8.3	Equipment specifications for processing of horticultural crops ....	295
	References.....	296
<b>11</b>	<b>Food Drying and Evaporation Processing Operations .....</b>	<b>303</b>
	<i>William L. Kerr</i>	
11.1	Introduction.....	303
11.2	Water in Foods.....	303

11.3	Types of Water in Foods .....	305
11.4	Food Stability and Moisture Relationships.....	306
11.5	Drying.....	310
11.5.1	Psychrometrics.....	310
11.6	Drying Curves and Mechanisms of Drying .....	311
11.7	Types of Dryers .....	316
11.7.1	Hot air dryers.....	316
11.7.2	Sun or solar drying .....	317
11.7.3	Batch dryers.....	317
11.7.4	Rotary dryers .....	318
11.7.5	Vacuum dryers .....	318
11.7.6	Continuous dryers.....	319
11.7.7	Belt dryers .....	320
11.7.8	Fluidized bed dryer.....	320
11.7.9	Puff-drying.....	320
11.7.10	Drum drying .....	321
11.7.11	Spray drying .....	322
11.7.12	Osmotic drying .....	324
11.7.13	Freeze drying .....	324
11.8	Quality Changes during Drying .....	326
11.9	Evaporation.....	328
11.10	The Basic Evaporator.....	329
11.10.1	Pan and batch evaporators.....	329
11.11	Tube Evaporators.....	330
11.11.1	Short tube evaporator .....	330
11.11.2	Rising film evaporator.....	331
11.11.3	Falling film evaporator .....	331
11.11.4	Rising-falling film evaporator .....	332
11.11.5	Agitated film evaporator.....	333
11.12	Single Effect Evaporators.....	334
11.13	Multi-Effect Evaporators.....	335
11.14	Mechanical Vapor Recompression .....	336
11.15	Quality Changes During Evaporation .....	338
11.16	Conclusion .....	338
	References.....	339
<b>12</b>	<b>Food Freezing Technology .....</b>	<b>341</b>
	<i>Kasiviswanathan Muthukumarappan, Chenchaiiah Marella</i>	
12.1	Introduction.....	341
12.2	Freezing Point Depression .....	342

12.3	Freezing Process .....	342
12.4	Phase Change and Ice Crystals Formation .....	345
12.5	Product Heat Load.....	346
12.6	Freezing Time Estimations.....	347
12.6.1	Plank's equation.....	348
12.6.2	Factors affecting the freezing time.....	348
12.6.3	Modified Plank's equation.....	349
12.7	Freezing Equipment.....	351
12.7.1	Direct contact freezers using cold surface .....	351
12.7.2	Freezers using air as cooling medium .....	353
12.7.3	Freezers using liquids as cooling media .....	357
12.8	Effects of Freezing and Frozen Storage on Foods .....	359
12.8.1	Effect freezing on physical characteristics.....	359
12.8.2	Effects of freezing on food constituents .....	360
12.8.3	Effects of freezing on thermal properties of foods.....	360
12.9	Developments in Freezing Techniques .....	362
12.9.1	High pressure freezing .....	362
12.9.2	Dehydrofreezing .....	362
12.10	Energy Conservation in Freezing.....	363
12.11	Scope for Future Focus .....	363
	References.....	364
<b>13</b>	<b>Heat and Mass Transfer in Food Processing.....</b>	<b>367</b>
	<i>Mohammed Mehdi Farid</i>	
13.1	Basic Concepts of Heat and Mass Transfer .....	367
13.1.1	Conduction heat transfer .....	368
13.1.2	Forced convection heat transfer .....	370
13.1.3	Free convection heat transfer .....	370
13.1.4	Radiation heat transfer .....	371
13.1.5	Mass diffusion .....	371
13.1.6	Mass transfer by convection.....	372
13.2	Case Study 1: Thermal Sterilization Using Computational Fluid Dynamics .....	372
13.2.1	Simulations of thermal sterilization in a vertical can.....	374
13.2.2	Simulation of bacteria deactivation during sterilization.....	375
13.2.3	Simulation of vitamins destruction during sterilizaion.....	376
13.2.4	Simulation of a horizontal can during sterilization .....	377
13.2.5	Simulation of a 3-D pouch during sterilization .....	377
13.3	Case Study 2: New Approach to the Analysis of Heat and Mass Transfer in Drying and Frying .....	378

13.4	Case Study 3: Microwave Thawing of Frozen Meat.....	381
13.4.1	Theoretical analysis.....	383
13.4.2	Discussion of results.....	386
13.4.3	Nomenclature.....	386
13.4.4	Greek symbols.....	389
	References.....	389
<b>14</b>	<b>Food Rheology .....</b>	<b>391</b>
	<i>Qixin Zhong</i>	
14.1	Introduction.....	391
14.2	Basic Concepts in Rheology .....	391
14.2.1	Stress and strain.....	391
14.2.2	Constitutive relations and classification of materials .....	393
14.2.3	The importance of time, Deborah number.....	395
14.3	Rheology of Fluids .....	395
14.3.1	Shear strain rates in a laminar flow .....	395
14.3.2	Apparent viscosity and yield stress.....	396
14.3.3	Rheological models for fluids .....	397
14.3.4	Rheometry.....	400
14.4	Rheology of Semi-Solid Materials.....	403
14.4.1	Small amplitude oscillatory shear tests.....	404
14.4.2	Stress relaxation tests .....	409
14.4.3	Creep tests .....	410
14.5	Interfacial Rheology .....	411
14.5.1	Interfacial dilatational rheology .....	412
14.5.2	Interfacial shear rheology .....	413
14.6	Conclusions.....	413
	References.....	414
<b>15</b>	<b>Thermal Processing for Food Sterilization and Preservation .....</b>	<b>415</b>
	<i>Arthur A. Teixeira</i>	
15.1	Introduction.....	415
15.2	Scientific Principles: Food Microbiology Considerations .....	415
15.2.1	An overview .....	415
15.2.2	Sterilizing value.....	416
15.2.3	Process lethality.....	417
15.2.4	Specification of process lethality .....	419
15.3	Scientific Principles: (Engineering Heat Transfer Considerations).....	420
15.3.1	Steady state (isothermal) heat transfer.....	420
15.3.2	Unsteady (non-isothermal) heat transfer.....	420

15.3.3 Heat transfer mechanisms ..... 421

15.3.4 Heat penetration measurement ..... 422

15.4 Process Calculation ..... 423

15.5 Commercial Retort Sterilization Equipment Systems ..... 426

15.5.1 Batch retorts..... 426

15.5.2 Continuous retort systems ..... 428

15.6 Commercial Aseptic Process Equipment Systems..... 438

15.7 Low-Acid Canned Food Regulations..... 443

15.7.1 Plant registration..... 443

15.7.2 Process filing ..... 444

15.7.3 Personnel training ..... 444

15.7.4 Equipment and procedure..... 444

15.7.5 Product preparation ..... 445

15.7.6 Establishing scheduled processes..... 445

15.7.7 Thermal process operations..... 446

15.7.8 Process deviations ..... 446

15.7.9 Container closure and coding..... 447

15.7.10 Records and storage ..... 447

15.7.11 Recall planning..... 448

## **PART 4 FOOD PACKAGING SYSTEMS AND MACHINERY DESIGN..... 663**

### **21 Damage Reduction to Food Products during Transportation and Handling ... 665**

*Jay Singh, Paul Singh*

21.1	Introduction.....	665
21.2	Functions of Packaging .....	665
21.2.1	Containment.....	666
21.2.2	Protection.....	667
21.2.3	Communication.....	668
21.2.4	Utility .....	668
21.3	Food Product Categories .....	670
21.3.1	Meats.....	670
21.3.2	Seafood .....	671
21.3.3	Vegetables and fruits .....	672
21.3.4	Processed versus non-processed.....	675

21.4	Food Product Distribution Environment.....	675
21.4.1	Harvesting.....	675
21.4.2	Packing .....	675
21.4.3	Shipping.....	677
21.4.4	Storage and shelf life.....	677
21.5	Major Causes of Food Spoilage/Damage in Supply Chain.....	677
21.5.1	Microbiological spoilage .....	678
21.5.2	Biochemical .....	678
21.5.3	Chemical .....	678
21.5.4	Macrobiological spoilage .....	678
21.5.5	Physical.....	679
21.6	Packaging Materials .....	679
21.6.1	Paper .....	680
21.6.2	Plastic.....	681
21.6.3	Metal.....	683
21.6.4	Glass .....	684
21.7	“Smart” Packaging .....	684
21.7.1	Active packaging .....	685
21.7.2	Modified Atmosphere Packaging (MAP).....	685
21.7.3	Controlled Atmosphere Packaging (CAP) .....	686
21.7.4	Intelligent packaging .....	686
21.8	Trends in Protective Food Packaging of 2000 and Beyond.....	686
21.8.1	Food packaging trends .....	686
21.8.2	Damage reduction trends.....	690
