<i>Contributor contact details</i>	xiii
<i>Introduction</i>	xvii
1 Cheese manufacture and ripening and their influence on cheese flavour	1
<i>P. L. H. McSweeney, University College, Cork, Ireland</i>	
1.1 Influence of cheese manufacture on ripening and quality	1
1.2 Overview of cheese ripening	5
1.3 Bitterness	16
1.4 Acceleration of cheese ripening	17
1.5 Acknowledgement	19
1.6 References	20
2 Compounds associated with cheese flavor	26
<i>B. Ganesan and B. C. Weimer, Utah State University, USA and M. C. Qian and H. M. Burbank, Oregon State University, USA</i>	
2.1 Introduction	26
2.2 Bacteria and cheese flavor	27
2.3 Cheese flavor	28
2.4 Future trends	41
2.5 Sources of further information and advice	42
2.6 References	42

Part I Microbial physiology and the development of cheese flavour

3 Carbohydrate metabolism and cheese flavour development	55
<i>M. G. Wilkinson, University of Limerick, Ireland and K. N. Kilcawley, Moorepark Food Research Centre, Ireland</i>	
3.1 Carbohydrate compounds present in milk	55
3.2 Cheese manufacture and ripening	57
3.3 Carbohydrate metabolism and flavour formation from amino acid catabolism	63
3.4 Future trends	65
3.5 Sources of further information and advice	66
3.6 References	66
4 Amino acid metabolism in relationship to cheese flavor development	70
<i>B. Ganesan and B. C. Weimer, Utah State University, USA</i>	
4.1 Introduction	70
4.2 Compounds associated with cheese flavor	71
4.3 Proteolysis in cheese	72
4.4 Amino acid metabolism	73
4.5 Carbohydrate starvation in LAB	89
4.6 The nonculturable state	90
4.7 Future trends	92
4.8 Sources of further information and advice	93
4.9 References	93
5 Lipolysis and cheese flavour development	102
<i>M. G. Wilkinson, University of Limerick, Ireland</i>	
5.1 Introduction	102
5.2 Lipolysis and cheese flavour	103
5.3 Identification of fat-related aroma compounds important for cheese flavour	107
5.4 Improving the flavour of cheese by manipulating lipolysis ..	111
5.5 Future trends	113
5.6 Sources of further information and advice	114
5.7 References	115
6 The relative contributions of starter cultures and non-starter bacteria to the flavour of cheese	121
<i>M. Gobbetti, M. De Angelis, R. Di Cagno and C. G. Rizzello, Università degli Studi di Bari, Italy</i>	
6.1 Introduction	121
6.2 Cheese-related microorganisms	122
6.3 Lactose, lactate and citrate metabolisms	131
6.4 Proteolysis	134

6.5	Lipolysis	144
6.6	Flavour improvement	146
6.7	Future trends	147
6.8	References	147
7	Starter culture development for improved cheese flavour	157
	<i>M. C. Broome, Australian Starter Culture Research Centre, Australia</i>	
7.1	Introduction to starter cultures	157
7.2	Factors affecting flavour formation by starter cultures	163
7.3	Starter culture selection criteria	167
7.4	Improving the flavour potential of starter cultures	168
7.5	Commercial starter cultures	172
7.6	Future trends	172
7.7	Sources of further information and advice	174
7.8	References	174
8	Adjunct culture metabolism and cheese flavour	177
	<i>M. C. Broome, Australian Starter Culture Research Centre, Australia</i>	
8.1	Introduction to adjunct cultures	177
8.2	Adjunct culture types	180
8.3	Selection of adjunct cultures	184
8.4	Adjunct culture metabolism in the cheese matrix	191
8.5	Future trends	193
8.6	Sources of further information and advice	195
8.7	References	196
9	Techniques for microbial species identification and characterization to identify commercially important traits	199
	<i>D. J. O'Sullivan, University of Minnesota, USA</i>	
9.1	Introduction	199
9.2	Techniques for microbial species identification	200
9.3	Differentiation between strains within a species	206
9.4	Analysis of commercially important traits	211
9.5	Future trends	212
9.6	Sources of further information and advice	213
9.7	References	213
10	Genomics and cheese flavor	219
	<i>B. C. Weimer, Utah State University, USA</i>	
10.1	Introduction	219
10.2	Genomics	220
10.3	Functional genomics	224
10.4	Bioinformatics and flavor	230
10.5	Future trends	233
10.6	Sources of further information and advice	234
10.7	References	234

Part II Influence of ingredients, processing and physical and chemical factors on cheese flavour

11 The effects of milk, its ingredients and salt on cheese flavor ...	239
<i>V. V. Mistry, South Dakota State University, USA</i>	
11.1 Introduction	239
11.2 Source of milk	240
11.3 Concentrated milk	242
11.4 Influence of salt	248
11.5 Future trends	249
11.6 References	249
12 Physical factors affecting the flavour of cheese	252
<i>A. R. Hill, University of Guelph, Canada</i>	
12.1 Introduction	252
12.2 The general relationship between cheese composition, structure and flavour	253
12.3 General aspects of acidity in cheese	258
12.4 pH and the type of coagulation	260
12.5 Effects of pH history on cheese composition, structure and functionality	264
12.6 Redox history	270
12.7 Temperature history	271
12.8 Moisture	273
12.9 Improving cheese flavour by controlling physical factors	275
12.10 Sources of further information and advice	277
12.11 References	278
13 Flavorant–matrix interactions and flavor development in cheese	284
<i>S. Rankin, University of Wisconsin-Madison, USA and D. Berg, Tate and Lyle, USA</i>	
13.1 Introduction	284
13.2 Experiencing cheese flavor	285
13.3 Phase partitioning	285
13.4 Impact of partitioning on flavor generation in cheese	294
13.5 Future trends	296
13.6 References	297
14 Starter culture production and delivery for cheese flavour	300
<i>I. Powell, Australian Starter Culture Research Centre, Australia</i>	
14.1 Introduction	300
14.2 Strategic options	302
14.3 Sources of cultures	302
14.4 Starters, adjuncts and selection of cultures	305

14.5	Bacteriophages and strain selection	306
14.6	Characterization of cultures	307
14.7	Culture requirements	308
14.8	Starter culture growth and delivery	309
14.9	Future trends	320
14.10	Sources of further information and advice	321
14.11	References	323
15	Bacteriocins: changes in cheese flora and flavour	326
	<i>L. O'Sullivan, S. M. Morgan and R. P. Ross, Moorepark Food Research Centre, Ireland and C. Hill, University College Cork, Ireland</i>	
15.1	Introduction	326
15.2	What bacteriocins are and how they work	326
15.3	Bacteriocins of LAB – classification	327
15.4	Why are bacteriocins used in cheese?	328
15.5	Implications for cheese manufacturers	339
15.6	Future trends	340
15.7	Sources of further information and advice	341
15.8	References	342
 Part III Monitoring and evaluating cheese flavour		
16	Monitoring cheese ripening: new developments	351
	<i>J. Hugenholz and J. E. T. van Hylckama Vlieg, NIZO Food Research, The Netherlands</i>	
16.1	Introduction	351
16.2	Monitoring ripening on the metabolite level	353
16.3	Monitoring ripening on the enzyme level	357
16.4	Monitoring ripening on the bacterial level	361
16.5	High-throughput tools for monitoring cheese ripening	363
16.6	Future trends	366
16.7	References	366
17	Defining cheese flavor	370
	<i>M. A. Drake, North Carolina State University, USA</i>	
17.1	Introduction	370
17.2	The starting point: lexicon development	371
17.3	Building a foundation: how the lexicon provides the platform	383
17.4	Flavor chemistry linkages	385
17.5	Understanding the consumer	392
17.6	A global perspective	394
17.7	Future trends	395
17.8	Sources of further information and advice	395
17.9	References	395

18 Measuring cheese flavor	401
<i>K. Cadwallader, University of Illinois, USA</i>	
18.1 Introduction	401
18.2 Isolation of volatile components	402
18.3 Instrumental considerations	407
18.4 Linking of sensory and analytical data	410
18.5 Future trends	412
18.6 Sources of further information and advice	412
18.7 References	412
Part IV Improving the flavour of different types of cheese: case studies	
19 Hard Italian cheeses: Parmigiano-Reggiano and Grana Padano	421
<i>M. C. Qian and H. M. Burbank, Oregon State University, USA</i>	
19.1 Introduction	421
19.2 Aroma analysis	425
19.3 Aroma compounds of Parmesan and related Italian-style cheeses	426
19.4 References for production methods	439
19.5 References	439
20 Low temperature hard cheeses and semi-hard washed cheeses ..	444
<i>R. Jiménez-Flores and J. Yee, California Polytechnic State University, USA</i>	
20.1 Introduction	444
20.2 Flavor development of low temperature hard cheeses and semi-hard cheeses	456
20.3 Membrane filtration processes in cheese manufacture	463
20.4 Microencapsulation technology in accelerated ripening of cheeses	463
20.5 New technological innovations for reduced-fat cheeses	464
20.6 Future trends	467
20.7 References	467
21 Soft-ripened and fresh cheeses: Feta, Quark, Halloumi and related varieties	474
<i>E. Litopoulou-Tzanetaki, Aristotle University of Thessaloniki, Greece</i>	
21.1 Introduction: soft ripened cheeses	474
21.2 Feta and related cheeses	474
21.3 Acid and acid/rennet-curd fresh cheeses: introduction	483
21.4 Quark and other fresh cheeses	484
21.5 Rennet coagulated semi-hard fresh cheeses	487

21.6	Sources of further information and advice	489
21.7	References	490
22	Cheeses with secondary cultures: mould-ripened, smear-ripened and farmhouse cheeses	494
	<i>W. Bockelmann, Federal Research Centre for Nutrition and Food, Germany</i>	
22.1	Introduction	494
22.2	Mould ripened cheeses	496
22.3	Smear ripened cheeses	498
22.4	Microflora of cheese brines	505
22.5	Sensory description	505
22.6	New developments in starter technology	508
22.7	Conclusions and future trends	514
22.8	Sources of further information and advice	515
22.9	References	515
23	Producing low fat cheeses	520
	<i>J. Banks, NIZO Food Research, The Netherlands and B. Weimer, Utah State University, USA</i>	
23.1	Introduction	520
23.2	Technology of manufacture	521
23.3	Effects of fat reduction on flavour, texture and functionality ..	528
23.4	Future trends	531
23.5	Sources of further information and advice	532
23.6	References	532
24	Modelling Gouda ripening to predict flavour development	537
	<i>M. Verschueren, W. J. M. Engels, J. Straatsma, G. van den Berg and P. de Jong, NIZO Food Research, The Netherlands</i>	
24.1	Introduction	537
24.2	Modelling approach	539
24.3	Validation data	543
24.4	Examples of sub-models	543
24.5	Hybrid modelling: integration of sub-models	553
24.6	Improving the flavour of cheese by modelling	555
24.7	Future trends	558
24.8	Sources of further information and advice	560
24.9	References	561
