## **1 The Transportation Planning Process, 1**

- 1.1 Why are highways so important? 1
- 1.2 The administration of highway schemes, 1
- 1.3 Sources of funding, 2
- 1.4 Highway planning, 3
  - 1.4.1 Introduction, 3
  - 1.4.2 Travel data, 4
  - 1.4.3 Highway planning strategies, 6
  - 1.4.4 Transportation studies, 7
- 1.5 The decision-making process in highway and transport planning, 9
  - 1.5.1 Introduction, 9
  - 1.5.2 Economic assessment, 10
  - 1.5.3 Environmental assessment, 11
  - 1.5.4 Public consultation, 12
- 1.6 Summary, 13
- 1.7 References, 14

## **2 Forecasting Future Traffic Flows, 15**

- 2.1 Basic principles of traffic demand analysis, 15
- 2.2 Demand modelling, 16
- 2.3 Land use models, 18
- 2.4 Trip generation, 19
- 2.5 Trip distribution, 22
  - 2.5.1 Introduction, 22
  - 2.5.2 The gravity model, 23
  - 2.5.3 Growth factor models, 26
  - 2.5.4 The Furness method, 27
- 2.6 Modal split, 31
- 2.7 Traffic assignment, 34
- 2.8 A full example of the four-stage transportation modelling process, 36

- 2.8.1 Trip production, 36
- 2.8.2 Trip distribution, 37
- 2.8.3 Modal split, 40
- 2.8.4 Trip assignment, 41
- 2.9 Concluding comments, 42
- 2.10 References, 43

### **3 Scheme Appraisal for Highway Projects, 44**

- 3.1 Introduction, 44
- 3.2 Economic appraisal of highway schemes, 45
- 3.3 Cost-benefit analysis, 46
  - 3.3.1 Introduction, 46
  - 3.3.2 Identifying the main project options, 46
  - 3.3.3 Identifying all relevant costs and benefits, 48
  - 3.3.4 Economic life, residual value and the discount rate, 50
  - 3.3.5 Use of economic indicators to assess basic economic viability, 51
  - 3.3.6 Highway CBA worked example, 53
  - 3.3.7 COBA, 56
  - 3.3.8 Advantages and disadvantages of cost-benefit analysis, 58
- 3.4 Payback analysis, 59
- 3.5 Environmental appraisal of highway schemes, 61
- 3.6 The new approach to appraisal (NATA), 66
- 3.7 Summary, 72
- 3.8 References, 72

### **4 Basic Elements of Highway Traffic Analysis, 73**

- 4.1 Introduction, 73
- 4.2 Speed, flow and density of a stream of traffic, 73
  - 4.2.1 Speed-density relationship, 74
  - 4.2.2 Flow-density relationship, 76
  - 4.2.3 Speed-flow relationship, 76
- 4.3 Determining the capacity of a highway, 78
- 4.4 The 'level of service' approach, 79
  - 4.4.1 Introduction, 79
  - 4.4.2 Some definitions, 80
  - 4.4.3 Maximum service flow rates for multi-lane highways, 81
  - 4.4.4 Maximum service flow rates for 2-lane highways, 86
  - 4.4.5 Sizing a road using the Highway Capacity Manual approach, 90
- 4.5 The UK approach for rural roads, 92
  - 4.5.1 Introduction, 92
  - 4.5.2 Estimation of AADT for a rural road in its year of opening, 92
- 4.6 The UK approach for urban roads, 95
  - 4.6.1 Introduction, 95
  - 4.6.2 Forecast flows on urban roads, 96

- 4.7 Expansion of 12 and 16-hour traffic counts into AADT flows, 97
- 4.8 Concluding comments, 101
- 4.9 References, 101

## **5 The Design of Highway Intersections, 103**

- 5.1 Introduction, 103
- 5.2 Deriving design reference flows from baseline traffic figures, 104
  - 5.2.1 Existing junctions, 104
  - 5.2.2 New junctions, 104
  - 5.2.3 Short-term variations in flow, 104
  - 5.2.4 Conversion of AADT to highest hourly flows, 105
- 5.3 Major/minor priority intersections, 105
  - 5.3.1 Introduction, 105
  - 5.3.2 Equations for determining capacities and delays, 110
  - 5.3.3 Geometric layout details, 117
- 5.4 Roundabout intersections, 119
  - 5.4.1 Introduction, 119
  - 5.4.2 Types of roundabout, 120
  - 5.4.3 Traffic capacity at roundabouts, 125
  - 5.4.4 Geometric details, 130
- 5.5 Basics of traffic signal control: optimisation and delays, 132
  - 5.5.1 Introduction, 132
  - 5.5.2 Phasing at a signalised intersection, 133
  - 5.5.3 Saturation flow, 133
  - 5.5.4 Effective green time, 138
  - 5.5.5 Optimum cycle time, 139
  - 5.5.6 Average vehicle delays at the approach to a signalised intersection, 142
  - 5.5.7 Average queue lengths at the approach to a signalised intersection, 144
  - 5.5.8 Signal linkage, 146
- 5.6 Concluding remarks, 151
- 5.7 References, 151

## **6 Geometric Alignment and Design, 153**

- 6.1 Basic physical elements of a highway, 153
- 6.2 Design speed, stopping and overtaking sight distances, 155
  - 6.2.1 Introduction, 155
  - 6.2.2 Urban roads, 156
  - 6.2.3 Rural roads, 157
- 6.3 Geometric parameters dependent on design speed, 162
- 6.4 Sight distances, 163

- 6.4.1 Introduction, 163
- 6.4.2 Stopping sight distance, 163
- 6.4.3 Overtaking sight distance, 165
- 6.5 Horizontal alignment, 167
  - 6.5.1 General, 167
  - 6.5.2 Deriving the minimum radius equation, 168
  - 6.5.3 Horizontal curves and sight distances, 170
  - 6.5.4 Transitions, 173
- 6.6 Vertical alignment, 178
  - 6.6.1 General, 178
  - 6.6.2 K values, 179
  - 6.6.3 Visibility and comfort criteria, 179
  - 6.6.4 Parabolic formula, 180
  - 6.6.5 Crossfalls, 183
  - 6.6.6 Vertical crest curve design and sight distance requirements, 183
  - 6.6.7 Vertical sag curve design and sight distance requirements, 189
- 6.7 References, 191

## **7 Highway Pavement Materials and Design, 192**

- 7.1 Introduction, 192
- 7.2 Soils at subformation level, 194
  - 7.2.1 General, 194
  - 7.2.2 CBR test, 194
  - 7.2.3 Determination of CBR using plasticity index, 197
- 7.3 Subbase and capping, 200
  - 7.3.1 General, 200
  - 7.3.2 Thickness design, 200
  - 7.3.3 Grading of subbase and capping, 201
- 7.4 Traffic loading, 203
- 7.5 Pavement deterioration, 208
  - 7.5.1 Flexible pavements, 208
  - 7.5.2 Rigid pavements, 209
- 7.6 Materials within flexible pavements, 209
  - 7.6.1 Bitumen, 209
  - 7.6.2 Surface dressing and modified binders, 211
  - 7.6.3 Recipe specifications, 213
  - 7.6.4 Coated macadams, 214
  - 7.6.5 Asphalts, 216
  - 7.6.6 Aggregates, 217
  - 7.6.7 Construction of bituminous road surfacings, 218
- 7.7 Materials in rigid pavements, 220
  - 7.7.1 General, 220
  - 7.7.2 Concrete slab and joint details, 220
  - 7.7.3 Reinforcement, 223

- 7.7.4 Construction of concrete road surfacings, 224
- 7.7.5 Curing and skid resistance, 227
- 7.8 References, 228

## **8 Structural Design of Pavement Thickness, 229**

- 8.1 Introduction, 229
- 8.2 Flexible pavements, 229
  - 8.2.1 General, 229
  - 8.2.2 Road Note 29, 230
  - 8.2.3 LR1132, 231
  - 8.2.4 HD 26/01, 238
- 8.3 Rigid pavements, 242
  - 8.3.1 Jointed concrete pavements (URC and JRC), 242
  - 8.3.2 Continuously reinforced concrete pavements (CRCP), 248
- 8.4 References, 250

## **9 Pavement Maintenance, 251**

- 9.1 Introduction, 251
- 9.2 Forms of maintenance, 251
- 9.3 Compiling information on the pavement's condition, 253
- 9.4 Deflection versus pavement condition, 258
- 9.5 Overlay design for bituminous roads, 260
- 9.6 Overlay design for concrete roads, 263
  - 9.6.1 Bitumen-bound overlays placed over rigid pavements, 264
  - 9.6.2 Concrete overlays, 264
- 9.7 Sideway force coefficient routine investigation machine (SCRIM), 270
  - 9.7.1 Wet skidding, 270
  - 9.7.2 Using SCRIM, 271
  - 9.7.3 Grip tester, 272
- 9.8 References, 273
